1963 OREGON LOG PRODUCTION

by M. E. Metcalf

The production of logs in Oregon in 1963 totaled 8.7 billion board feet, 2 percent higher than 1962; again the highest since 1959. Production from private lands fell off nearly 8 percent while the cut from all public lands rose slightly over 11 percent, with the greatest increase, 262 million board feet, coming from Bureau of Land Management lands. Public lands contributed 56 percent of the total log production as compared with 52 percent in 1962. Of the production from private lands, 83 percent came from forest industry-owned lands.

Approximately 2.701 billion board feet of the 1963 production was reported as coming from the salvage of blowdown resulting from the October 12, 1962, windstorm:

	Million board feet
Bureau of Land Management	498
State	34
National Forest	757
Private	<u>1,412</u>
Total salvage	2,701

¹Separate data for public and private unavailable prior to 1958
